

dr Wiktor Bartol  
Institute of Mathematics  
University of Warsaw  
senior lecturer

Warsaw, June 2, 2005

**Recommendation for Mr Pawel Elert  
student of the Faculty of Economics  
of the Warsaw University**

This is to recommend Mr. Pawel Elert as an applicant for the student exchange between the University of Warsaw, Poland, and University of Sussex, United Kingdom.

Mr Elert attended my exercise courses on Mathematical Analysis in the academic year 2002/2003. It is worth stressing that, being inscribed into another student group, he had no obligation to attend additional classes. This, however, he did, in the clear intention of acquiring more practice with problems usually considered difficult by the students. His attendance was not just formal, I remember him as quite an active member of the group. His assiduity had good ultimate effect. Mr Elert obtained one of the highest grades on the final exam. This may also be a reflection of his general interest for mathematics, as his other activities seem to prove: participation in public lectures on mathematics and very good results on further mathematical exams, like Probability Theory (the highest grade at the final examination).

A handwritten signature in black ink, appearing to be 'W. Bartol', written in a cursive style.
